Portfolio — prathmeshmoralwar@gmail.com — LinkedIn —

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building end-to-end web applications — from **React** frontends to containerized **Node.js** backends. Experienced with **PostgreSQL**, **MongoDB**, **Docker**, and **AWS**, with a growing focus on **AI-integrated systems**, RAG pipelines, and LLM tooling. Passionate about system design, code quality, and building scalable, production-ready software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript HTML, CSS, C++, SQL

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js Sequelize ORM, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Firebase, ElasticSearch

DevOps & Cloud: Docker, GHCR, AWS, Azure, Git, GitHub, Github Actions

Tools: Postman, Kibana, Packet Tracer, NS3

WORK EXPERIENCE

Web Developer Intern

Feb 2025 – Dec-2025

Careasa HealthCare Pvt. Ltd.

Pune, Maharashtra

- Engineered modular CRM features in React using a component-driven architecture, improving UI reusability and reducing rendering overhead across interconnected user workflows.
- Designed and implemented RESTful APIs in Node.js and Express with layered middleware for authentication, input validation, and centralized error handling, supporting reliable real-time data operations across the platform.
- Managed relational data models with PostgreSQL and Sequelize ORM, writing association-based queries with deliberate indexing strategies to improve data retrieval efficiency in high-read backend operations.

PROJECTS

Therasim- Medical Training Platform (Internship) — React, Express, PostgreSQL, Node.js, Docker, Azure

- Architected a multi-tenant SaaS platform with strict data isolation, implementing Role-Based Access Control (RBAC), JWT session management, and Google OAuth2.0 to support multiple institution-level configurations from a single deployment.
- Built a fully containerized backend using Docker with Node.js, Express, and PostgreSQL via Sequelize ORM, maintaining environment parity between development and production and simplifying deployment pipelines.
- Integrated real-time AI chat, 3D model rendering via React Three Fiber (R3F), and file upload/download pipelines within a multi-role dashboard system serving students, instructors, and administrators concurrently.

Clinical Decision Support System — AI, RAG, LLMs, Web Development — GitHub

- Designed the complete web interface for an AI-powered CDS platform with dynamic form-based medical case input, contextual state management, and structured data flow between the UI and the AI inference layer.
- Architected a Retrieval-Augmented Generation (RAG) pipeline using LLMs to surface relevant medical knowledge and produce explainable differential diagnostic directions grounded in retrieved clinical context.
- Implemented structured prompt engineering with response schema validation and uncertainty-aware output formatting to ensure safe, interpretable AI responses suitable for clinical use.

T&C Analyzer – Terms and Condition Reader — HTML, CSS, JS, Chrome APIs, REST, Blob — GitHub

- Engineered a full-stack Chrome extension integrating REST APIs (Perplexity/Gemini) for AI-powered legal document analysis, with real-time state management, a modern gradient UI, and multi-format export capabilities.
- Built a resilient JSON parsing system with five cascading fallback strategies — including regex extraction and strict schema validation — ensuring consistent, reliable output across varying API response structures.
- Designed a cost-optimized dual-model architecture with smart rate limiting, graceful error recovery, and a free-tier fallback, sustaining high-volume daily usage with minimal operational overhead.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Cloud Practitioner Essentials** – AWS Jan 2026
- Postman API Fundamentals** – Postman Dec 2025
- Networking Basics** – Cisco Networking Academy Sept 2025
- Solved **100+** problems Solved on LeetCode.

EDUCATION

Vishwakarma Institute of Information Technology

Pune, India

B.Tech in Electronics and Telecommunication Engineering-2027; CGPA: 8.90
