PROFESSIONAL SUMMARY

Motivated Web Developer with expertise in **full-stack development** and strong foundation in **Data Structures and Algorithms**. Proficient in **Docker** with keen interest in **cloud technologies**, DevOps, and system design. Passionate about problem-solving, code quality, and continuous learning. Known for strong communication, collaboration, and adaptability. Eager to contribute to high-impact, cross-disciplinary projects.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, C++

Frameworks: Node.js, React.js, Sequelize ORM

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Elastic Search

Tools & Technologies: Docker, GHCR, AWS, Postman, REST APIs, Git, GitHub, Networking, Kibana, Packet Tracer, Tailwind

WORK EXPERIENCE

Web Developer Intern

Feb 2025 – Present

Careasa HealthCare Pvt. Ltd.

Pune, Maharashtra

- Built and enhanced CRM features using React for a dynamic frontend experience, improving user interaction and operational efficiency.
- Developed RESTful APIs with Node.js and Express, enabling seamless communication between client and server for real-time data operations.
- Worked extensively with PostgreSQL and Sequelize ORM, ensuring robust data management and optimizing database performance across the platform.

PROJECTS

Therasim- Medical Training Platform (Internship) — React, express, PostgreSQL, Nodejs, Docker

- Tech-Stack:** React.js, Node.js, Express.js, PostgreSQL, Sequelize, R3f.js, JWT, OAuth, bcrypt, Docker.
- Architecture:** Implemented a RESTful API design, Role-Based Access Control, Protected Routes, Docker containerization
- Real-time AI chat sessions, 3D model integration, file upload/download, Multi-role dashboards, Multi-tenant-user-interface comprehensive analytics. Multi-institution SaaS architecture with data isolation with Google OAuth2.0 and JWT Token.

Clinical Decision Support System — AI, RAG, LLMs, Web Development

- Developed the web interface for an AI-based Clinical Decision Support (CDS) platform enabling structured medical case input and analysis.
- Integrated a Retrieval-Augmented Generation (RAG) pipeline using LLMs to generate explainable differential diagnostic directions.
- Implemented structured prompt engineering and response schema validation to ensure safe, uncertainty-aware outputs.

T&C Analyzer – Terms and Condition Reader(web-Parser) — HTML, CSS, JS, Chrome APIs, REST, Blob

- Developed end-to-end Chrome extension featuring AI-powered legal document analysis, integrating REST APIs (Perplexity/Gemini), implementing state management, and building modern gradient UI with export capabilities
- Created intelligent parsing system handling multiple JSON formats with 5 fallback methods, regex extraction, and data validation, ensuring 95%+ reliability across varying API response structures.
- Built cost-efficient dual-model architecture (~\$0.01/analysis paid, free tier backup) with smart rate limiting and error recovery, processing 250+ daily analyses

CAREER ACHIEVEMENTS

- Contributed to several hackathons, designing and implementing creative tech solutions in competitive environment.
- Organized and conducted multiple workshops and events as part of the Department Student Club, enhancing student engagement and learning.

EDUCATION

Vishwakarma Institute of Information Technology

Pune, India

B.Tech in Electronics and Telecommunication Engineering(ENTC); CGPA: 8.90
